On the reverse side of each chart are tabulated comprehensive data for all radio stations in operation, classified as to Aids to Navigation and Control Towers. The Aids to Navigation data include the type, class, identification, and other information pertaining to radio facilities of each radio station, together with the elevation and bearing of the airport serviced by the station.

Under the program for the maintenance of these charts revisions are made on a weekly schedule, to provide the users of the charts with the latest changes in radio facilities data, with a minimum of delay. An index sheet showing the arrangement of the charts of the series and a legend sheet identifying the symbolization employed in the series are furnished free with all orders for RF charts.

Radio facility charts are distributed at 5 cents each, or they may be obtained on an automatic subscription basis at an annual subscription price of 10 cents per year per chart when ordered in quantities of 20 or more of any one chart. Subscriptions will include all revisions during the year. Announcement will be made in the next issue of arrangements whereby persons desiring to subscribe for a single set of all 42 charts with revision service may do so at a special rate. Cost estimates are now being made by the Coast and Geodetic Survey for this new service designed especially to help the personal flier.

Orders for less than 20 copies will not constitute a subscription and must be purchased as individual orders with the usual 33-1/3% discount on gross orders of $10.00 or more in one shipment to one address. All subscriptions must be paid for at the time of placing the order and no subscription will be honored unless accompanied by the proper remittance. A subscription can cover only one individual chart. A grouping of several charts to make up a subscription will not be accepted.

It is estimated that an average of four revisions will be made of each chart per year, but if conditions do not warrant the issue of more than one revision it is understood that only one will be made.

Orders for charts should be addressed to the Director, U. S. Coast and Geodetic Survey, Washington 25, D. C.

U. S.
LIBRARY

SPECIAL NOTICE

The Airman's Guide dated August 5, 1947, will be the last issue to appear in its present form. Beginning with the August 19th issue the Guide no longer will carry the charts and facing data pages, but will include the Notices to Airmen. This step has been made necessary by reductions in appropriations.

Airport Directory information will be included in the semi-annual Flight Information Manual, the next issue of which will be dated January 1, 1948. It is, therefore, important that you save this issue of the Airman's Guide since it will contain the most up-to-date Airport Directory available until January 1, 1948.

The Government Printing Office will continue to mail you the Airman's Guide every two weeks until your present subscription expires. You can then order a new subscription, covering both the revised Airman's Guide and the combined Flight Information Manual and Airport Directory, for $6.00 a year. Money orders should be sent to Superintendent of Documents, Washington 25, D. C.

Many subscribers may wish to supplement the Airman's Guide with the Radio Facilities Charts published by the Coast and Geodetic Survey. A single set of 42 charts covering the U.S., with revised charts issued on an average of four times a year may be obtained from the Coast and Geodetic Survey for $4.50 a year. Orders for these charts should be addressed to the Director, U.S. Coast and Geodetic Survey, Washington 25, D.C.

AIRMAN'S GUIDE

NOTICES TO AIRMEN
DIRECTORY OF AIRPORTS
AIR NAVIGATION RADIO AIDS

VOL. 2, NO. 10 .....AUGUST 5, 1947

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

V.H.F. RANGE CHARTS ..... 144 - 148

AIRWAY MILEAGES 149

NOTICES TO AIRMEN 150

GUIDE CONTENTS

THE AIRMAN'S GUIDE IS A COMPOSITE DIRECTORY OF AIRPORTS, AIR NAVIGATION RADIO AIDS, AND NOTICES TO AIRMEN. ON THE DATA PAGES ARE TABULATED ALL THE DATA COVERING THE FACILITIES CHARTED ON THE BACKING PAGES. THIS PRESENTATION IS GRADUALLY BEING REVISED, HOWEVER, SO THAT EVENTUALLY THE DATA PAGES WILL FACE THE CHARTS.

INDEX OF FACILITIES

TO FIND THE NUMBER OF THE PAGE ON WHICH A FACILITY IS CHARTED, REFER TO THE INDEX OF FACILITIES BELOW. AS OUTLINED ABOVE, THE DETAILED DATA FOR THE FACILITY WILL BE FOUND ON THE DATA PAGE BACKING, OR FACING, THE CHART.

NEW DATA PRESENTATION

(A) ON THE DATA PAGES BACKING OR FACING THE CHARTS, NEW DATA OR REVISIONS ARE INDICATED BY ARROWS; (B) IN THE NOTICES TO AIRMEN SECTION, CITATIONS COVERING NEW OR REVISED RADIO DATA ARE PREFIXED BY ONE LARGE STAR " ★ " CITATIONS COVERING NEW OR REVISED AIRPORT, OR MISCELLANEOUS DATA ARE PREFIXED BY TWO ASTERISKS "**"

DATA PAGE NOTAMS

BECAUSE OF THE SERIOUS PAPER SHORTAGE, THE DATA PAGES, WHERE POSSIBLE, HAVE TO SERVE AS NOTAM (NOTICES TO AIRMEN) PAGES, RESULTANTLY, MOST OF THE NEW DATA FORMERLY NOTAMIZED IN THE NOTICES TO AIRMEN SECTION WITH PREFIXED LARGE STARS OR DOUBLE ASTERISKS ARE NO LONGER CARRIED IN THAT SECTION. ONLY COMMISSIONINGS, ABANDONMENTS, OR CHANGES SO POTENTIALLY HAZARDOUS THAT THEY ARE INDICATED WITH Ⓡ (FOR RED FLAG) SYMBOLS ON THE CHARTS, ARE NOW CITED IN THE NOTICES TO AIRMEN SECTION NOTAMIZING ON THE DATA PAGES IS EFFECTED BY THE USE OF PREFIXED ARROWS AS IN THE FORMER AIR NAVIGATION RADIO AIDS PUBLICATION. ANY CHANGES FROM THE PREVIOUS ISSUE, WHETHER CITED IN THE NOTICES TO AIRMEN SECTION, OR NOT, ARE INDICATED BY THE PREFIXED ARROWS. FOLLOWING ARE EXAMPLES OF CHANGES NOTAMIZED ONLY ON THE DATA PAGES: FIELD OBSTRUCTION, SERVICING, ELEVATION, LOCATION, AND RUNWAY LENGTH CHANGES. BECAUSE OF THE USE OF THE PREFIXED ARROWS AS NEW DATA INDICATORS, A FURTHER INNOVATION HAD TO BE ADOPTED. THIS IS A TINTED HORIZONTAL LINE FOLLOWING THE LAST TABULATED FACILITY AND TITLED EITHER NEW RADIO FACILITIES OR NEW AIRPORTS.

HOW TO USE THE AIRMAN'S GUIDE

NEW FACILITIES ON DATA PAGES

SPACE BELOW THE TINTED HORIZONTAL LINES ON THE DATA PAGES HAS BEEN RESERVED AS A SUPPLEMENT FOR NEW RADIO AIDS AND AIRPORTS WHOSE DATA WERE RECEIVED AFTER THE DATA PAGES WERE ORIGINALLY TYPED. REVISIONS TO EXISTING AIRPORTS AND RADIO AIDS ARE SUPER-IMPOSED ON THE OLD DATA. NEW AIRPORTS AND RADIO AIDS HOWEVER, ARE LISTED, NECESSARILY OUT OF ALPHABETICAL ALIGNMENT, BELOW THE TINTED HORIZONTAL LINES UNTIL THE PAGE IS RE-TYPED.

CHART NOTAMS

NOTAMIZING ON THE CHARTS IS EFFECTED BY USE OF THE SUPER-IMPOSED Ⓡ AND Ⓞ SYMBOLS. THE Ⓡ (FOR RED FLAG) INDICATES A VERY HAZARDOUS CONDITION OR A MAJOR CHANGE. THE Ⓞ SYMBOL (FOR ORANGE FLAG) INDICATES A MINOR CHANGE OR HAZARDOUS CONDITION WITH THE FACILITY STILL USABLE WITH CAUTION. THE PERTINENT DETAILS TO WHICH THESE SYMBOLS REFER WILL BE FOUND LISTED IN THE NOTICES TO AIRMEN SECTION UNDER THE FACILITY NAME (AND STATE) BY WHICH THEY ARE CHARTED.

Ⓡ and Ⓞ SYMBOLS

THESE SYMBOLS WERE ADOPTED FOR SUPER-IMPOSITION OVER CHARTED FACILITIES TO INDICATE HAZARDOUS CONDITIONS AND COVERING NOTICES TO AIRMEN. THUS, IF A CHART USER NOTES NO SYMBOL ON THE FACILITIES HE IS PLANNING ON USING, THERE IS NO NECESSITY FOR HIM TO WADE THROUGH THE 30-ODD PAGE NOTICES TO AIRMEN SECTION

NOTICES TO AIRMEN SECTION

ALL TEMPORARY CONDITIONS (FIELD SOFT, RUNWAY UNDER CONSTRUCTION, RANGE COURSE OUT OF ALIGNMENT, ETC) ARE CITED IN FULL IN THE NOTICES TO AIRMEN SECTION UNTIL THEY ARE NO LONGER IN EFFECT. WHEN A CITATION CARRIES A PERMANENT ITEM AND A TEMPORARY ITEM, THE PERMANENT ITEM IS UNDERLINED. PARENTHETICAL DATE AT END OF ITEM INDICATES TIME ITEM WAS REPORTED. TO CONFORM TO CHART PRACTICE, ALL FACILITY DATA ARE LISTED IN THE NOTICES TO AIRMEN SECTION AND ON DATA PAGES ALPHABETICALLY BY STATES AND BY FACILITY NAME. THUS, AN AIRPORT WILL BE FOUND LISTED ALPHABETICALLY UNDER ITS OWN NAME RATHER THAN UNDER ITS LOCALE'S NAME. IF THE AIRPORT OR RADIO FACILITY NAME IS OTHER THAN THAT OF THE CITY IN WHICH IT IS LOCATED, THE LOCATION IS SHOWN IN PARENTHESIS AFTER THE FACILITY NAME.

SPECIAL NOTICES

NOTICES OF NATIONAL INTEREST, OF GREAT IMPORTANCE, OR OF NON-LOCALIZED NATURE, WILL BE FOUND AT THE BEGINNING OF THE NOTICES TO AIRMEN SECTION.

CIVIL FACILITY CHANGES: ADVISE WHOM

PLEASE ADVISE THE NEAREST C. A. A. AIRWAYS COMMUNICATIONS STATION BY TELEPHONE, TELEGRAPH, OR LETTER AS SOON AS TEMPORARY CONDITIONS COVERING CIVIL AIRPORTS OR NAVIGATIONAL AIDS BEGIN OR TERMINATE, OR FLIGHT HAZARDS ARE ERECTED OR REMOVED. FIELD DATA REVISIONS SHOULD BE SUBMITTED TO THE NEAREST C.A.A. DISTRICT AIRPORT ENGINEER.

TO ALL SUBMITTERS OF AIRMAN'S GUIDE DATA

AN UNDER-MANNED STAFF PREVENTS AN INDIVIDUAL ACKNOWLEDGMENT OF DATA SUBMITTED FOR THE AIRMAN'S GUIDE BY TELEGRAM, TELETYPE DISPATCH, OR LETTER. YOUR COOPERATION IN PERMITTING A GUIDE CITATION TO SUFFICE AS AN ACKNOWLEDGMENT WILL BE APPRECIATED.

INDEX OF FACILITIES

LEGEND

A - AIRPORT WITH AN ASSOCIATED RADIO FACILITY IDENTICALLY NAMED
FM - FAN MARKER
R - RADIO RANGE
T - AIRPORT WITH CONTROL TOWER

N.B. ALL FACILITIES WITHOUT A LETTER SUFFIX ARE AIRPORTS. NAMES NOT FOLLOWED BY A NUMBER SUFFIX ARE NOT AIRPORTS BUT MERELY GEOGRAPHICAL LOCATIONS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

AIR NAVIGATION RADIO AID

LEGEND

(3) - Station guards 3105, 4495, 6210 kcs
(4) - Station guards 3105, 4495, 6210, 3117.5 kcs.
(7-24) - Hours of operation (7 A M. to midnight) on a 24-hour clock basis
→ - New or revised data*

RADIO CLASS DESIGNATIONS

AC.....Approach Control Tower, CAA
B.....Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited)
C.....Control Tower, CAA
CA.....Control Tower, Army
CI.....Control Tower (City,County,Private, etc.)
CN.....Control Tower, Navy
D.....Distantly controlled
FM.....VHF fan type marker (100 watts)
FMHW.....Non-directional radio beacon when combined with fan marker.
GCA.....Ground control approach system
H.....Non-directional radio-beacon (homing), power 50 watts or more
ILS.....Instrument Landing System (voice on localizer channel)
IM.....VHF boundary marker
LFM.....VHF fan type marker, low powered (5 watts not over 10 miles from range)
LOR.....Low frequency omni-directional range
MH.....Non-directional radio-beacon (homing), power less than 50 watts
ML.....Range (loop radiators), power less than 50 watts
MM.....VHF middle m-
MMK.....Compass locator station when combined with middle marker of Instrument Landing System
MRA.....Range (adcock, vertical radiators), power more than 50 less than 150 watts
MRL.....Range (loop radiators), power more than 50 less than 150 watts
OM.....VHF outer marker
OMK.....Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P.....Point to point radio
RA.....Range (adcock, vertical radiators), power 150 watts or more
RL.....Range (loop radiators), power 150 watts or more
S.....Simultaneous (range signals and voice) type of transmitter
T.....Teletype
TX.....Principal teletype
V.....Additional voice feature on VHF
VAR.....Visual-aural VHF range (every VAR has simultaneous voice feature)
VOR.....VHF omni-directional range
W.....Without voice facilities
Z.....VHF station location marker at a range station

N.B. Variation is computed at the station. The distance from station to field is computed from the center of the range station to the nearest edge of the usable area of the airport. The bearing is that from the range station to airport or fan marker.

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radiobeacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Class MH stations operate on request unless otherwise cited. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

* AT THE BOTTOM OF THE LAST COLUMN, UNDER THE HEADING OF NEW RADIO FACILITIES, BORDERED BY TINTED LINE WILL BE FOUND, OUT OF ALPHABETICAL ALIGNMENT, ALL THE NEW RADIO FACILITIES TABULATED AFTER THE TYPE FOR THAT PAGE HAD BEEN ORIGINALLY SET UP.

N.B. For Digest of A.T.C. and Communications Procedures, see *FLIGHT INFORMATION MANUAL*

AIRPORT DATA
LEGEND

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A)	Airport name	(A)	- Owned or leased totally by Army

(P)	"		- Civil airport opened to military acft. (See Note 3)
★	"		- CAA Intermediate Field

CLASS — SIZE

4h: Length of longest landing strip (unpaved) in hundreds of feet
4hx: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited and indicated as "unl").

N.B. Only the length of the longest runway is cited, and its direction is not indicated. Space restrictions occasioned this policy, but logic justified it. The logical assumption may be made that runways have been laid out in accordance with the local wind rose. Therefore, in all calms, or gentle-angling winds, or winds aligned with the longest runway, the longest runway will be used. When a wind not aligned with the longest runway is of such intensity that the longest runway cannot be used, this wind makes the use of runway aligned with the wind, even though much shorter than the longest runway, sufficiently long from a safety viewpoint. Too, prior knowledge that there is, for example, a NW/SE runway is of little value to a pilot if, when he arrives over the field the wind is blowing too strongly from another direction to use that runway. Finally, the larger the number indicating the longest runway length, the greater is the assurance of a sufficient number of runways for all-wind coverage.

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

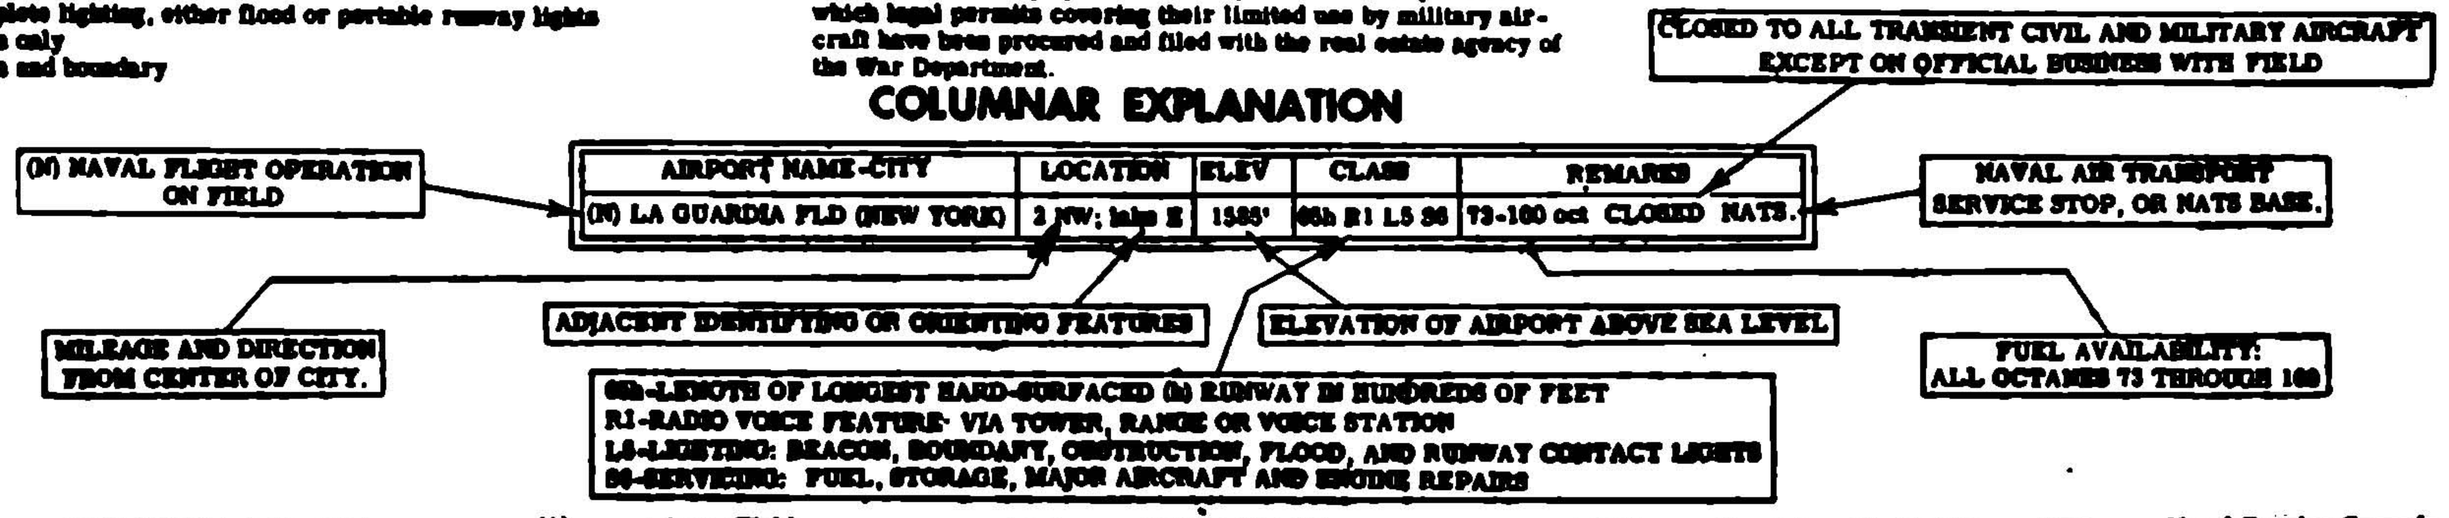
N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.

These fields are often recognizable by airport class, comparable to, for example, "1S S1". "1S S1" suggests that the field is not too large, and that the field may not have a full-time attendant even though fuel is stored there. Lack of radio or lighting facilities, indicated by the absence of an "R" or "L" in the airport class, is a further indication that a full-time attendant may not be available. Absence of an "S" (servicing) indicates definitely that fuel, if available at all, is available only by truck from town. Any field carrying no indication of radio (R), lights (L), or servicing (S) in airport class column should be used with caution, especially a field of the small category. Fields of this nature may be inactive or not maintained, and thus dangerous for use.

NOTES

1. "(NC)" not charted. Indicates not charted because of insufficient data or inability to verify.
2. ➔ New or revised data. ★
3. "(P)" in CITY-AIRPORT NAME column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the War Department.
4. "Effingham Int., 10, L5-ED" in CITY-AIRPORT NAME column indicates that the airport is Effingham CAA Intermediate Field, Sec 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no prefixed star or "Int.".
5. In Location column, the word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.
6. In Remarks column:
   (a) "91 oct.", indicates fuel octanes available. "Army", or "Navy" following octane indicates Army or Navy contract fuel available.
   (b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
   (c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway.
   (d) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned (See Special Notice).
   (e) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
   (f) "PRIVATE" indicates field is available for owner only, and not to be used by others except in emergency. Only those private fields that are clearly identifiable from the air as airports are listed. Too many personal use fields are not covered in the Guide because they are not marked or are too small.
   (g) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
   (h) "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field (and, in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
   (i) "FEE" indicates landing fee for private aircraft.
7. Airline stop airport names are capitalized or bracketed.

COLUMNAR EXPLANATION



AIRPORT NAME ABBREVIATIONS

(A)	- Army Field	LTA	- Lighter than Air	NAAS	- Naval Aux. Air Station	NPG	- Naval Proving Grounds

FLIGHT PLANNING CHARTS

LEGEND

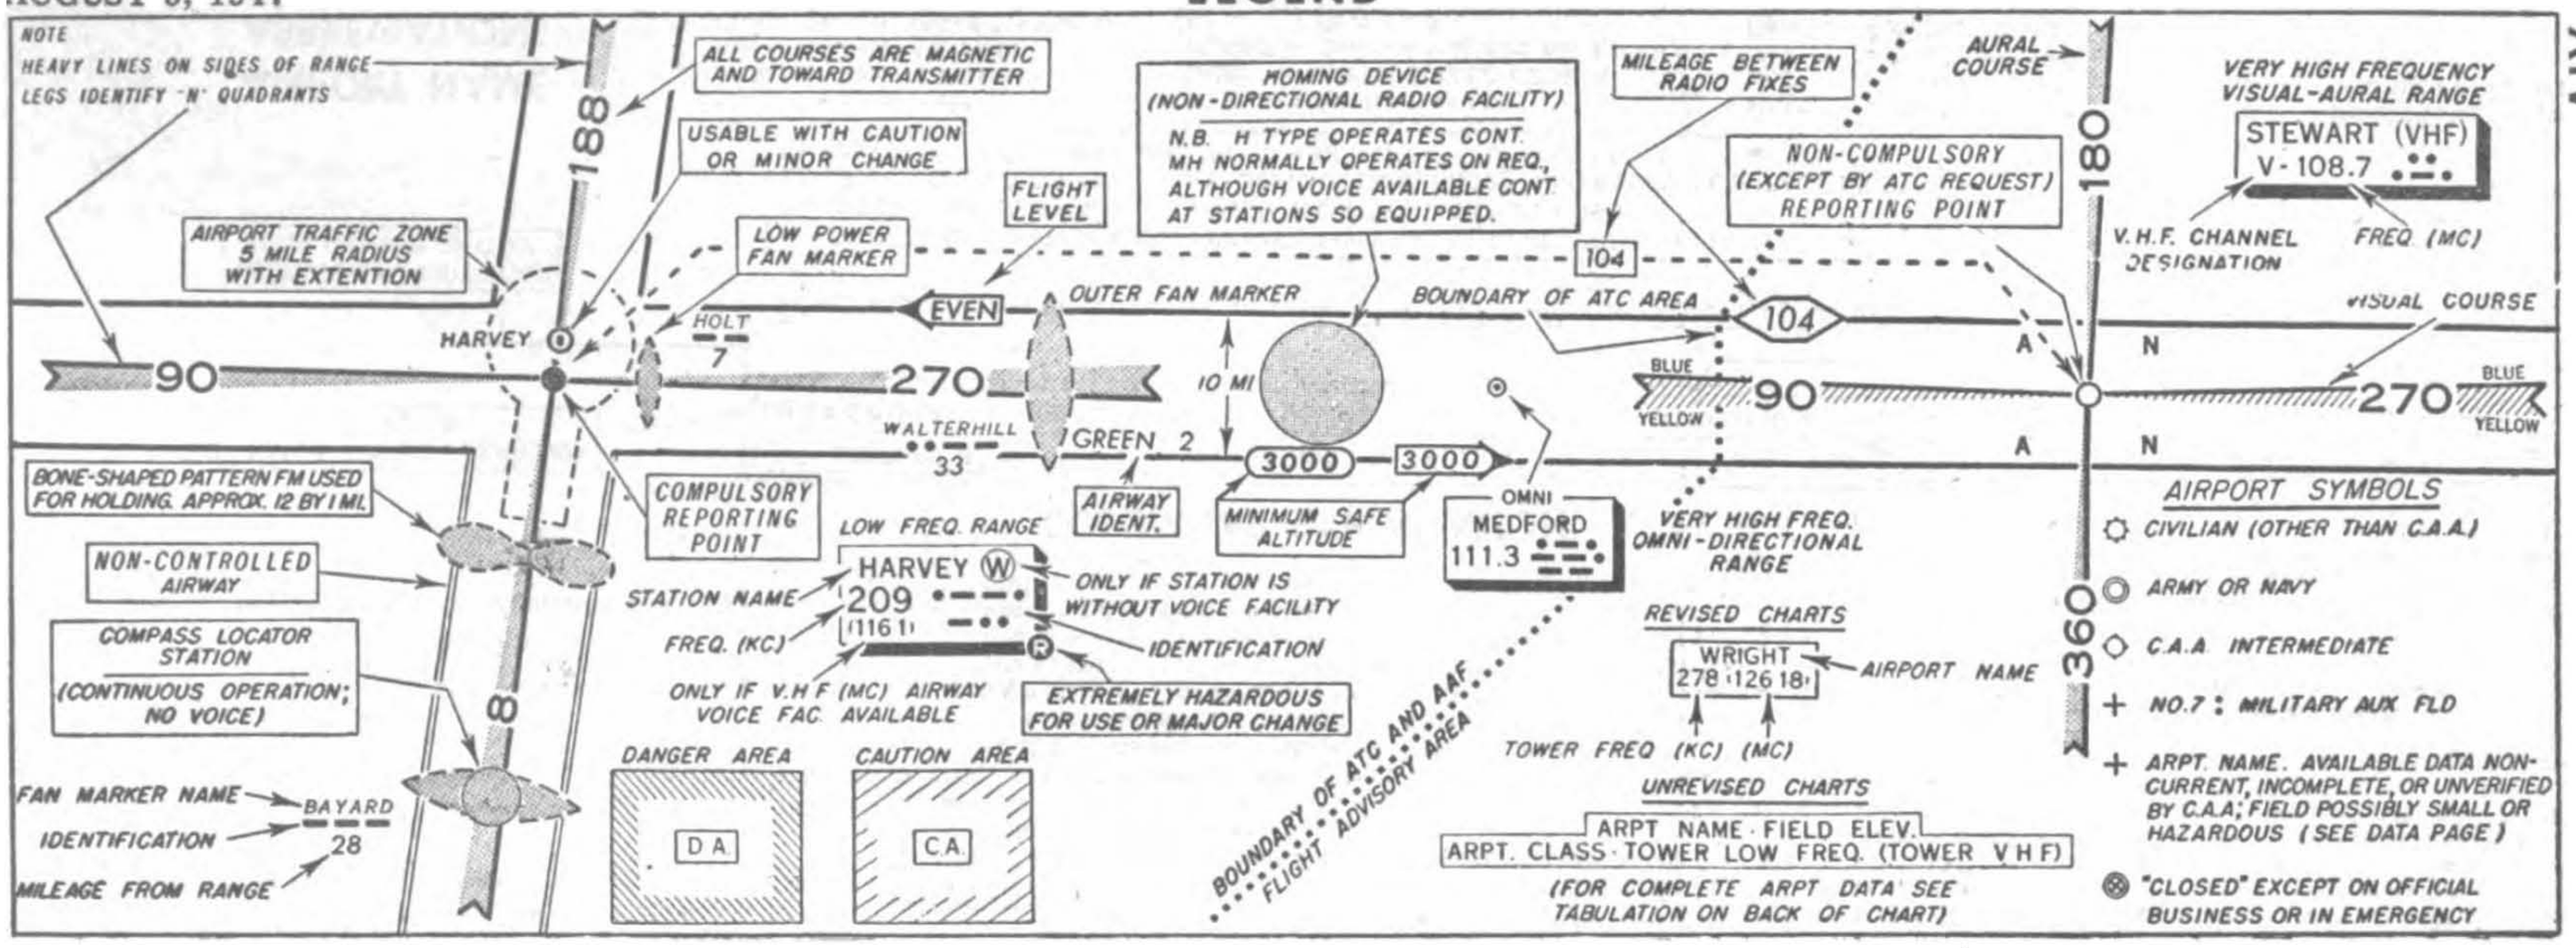

CHART CONTENTS

The Flight Planning Charts, in addition to the warning (R) and caution (O) symbols, indicate: (1) all aeronautical radio facilities except air carrier stations; (2) all minimum safe altitudes and fix mileages; (3) all Army and Navy fields and CAA intermediate fields, and all active civilian airports; (4) all danger and caution areas; (5) all designated airways These charts indicate all facilities, and the current status thereof, on record with the CAA as of 0001 E.S.T. each alternate Tuesday.

CHART PURPOSE AND USE

The primary purpose of these charts is to facilitate the planning and execution of cross-country flights. The user should check the charts for the symboled (R) or (O) items between his point of departure and his destination. If there is none, there is no necessity for him to read the Notices to Airmen section as far as temporary items are concerned. As for permanent changes - all major ones, such as new fields, abandoned fields, range frequency changes, etc., are currently reflected on the charts. For record-keeping purposes and for the correction of charts and publications, however, the Notices to Airmen section should be carefully read.

VHF CHANNEL LETTER DESIGNATORS

Channel letter designators are being shown on the Flight Planning Charts herein only as an aid to pilots in their use of unmodified military equipment. It is emphasized that not all very-high frequencies now in use have channel letter designators. Standardization of air-borne equipment in this respect has not been effected, nor is it expected to be along the lines of one-letter designators because of the large number of frequencies which eventually will be in use.

CHART HAZARD SYMBOLS

The current status of facilities and hazards as reported to the CAA is indicated by the symbol system. An airport closed because of construction, an inoperative range, a revised range quadrant identification or range frequency, or course realignment of 20° or more, for example, are indicated by the symbol (R) for red, or warning. An airport under construction but usable, or an inoperative control tower, on the other hand, is indicated by the symbol (O) for orange, or caution.

RANGE COURSE LENGTHS

In general, the length of radio range courses shown herein indicates the approximate location where it is expected that a pilot will tune from one radio range to the next one along his route of flight. Such change-over points, however, are not mandatory, and it is expected that a pilot will use his best judgment in selecting change-over points that will best serve his needs.

WARNING

Radio range courses are subject to disturbances that result in multiple courses, and signal fades and surges over rough country. Pilots flying over unfamiliar routes are cautioned to be on the alert to detect these vagaries, particularly over mountainous terrain.

Loop ranges (such as ML, RL, MRL without simultaneous feature) are not suitable for DF and ADF operations. DF or ADF use should be restricted to simultaneous type of range stations, H stations, and commercial broadcast stations.

N.B. The attempt to superimpose VHF ranges cartographically upon the low frequency system practically nullified the Guide charts for either VHF or LF navigation.

It was decided, therefore, to give the VHF ranges separate coverage. With the Guide's stringent page limitations, separate VHF range charts necessitated the elimination of the Civil Airways and Mileage Charts. Specific flight advisory and traffic control area boundaries and specific fix mileages, however, may still be found on the individual Guide Charts.

It is hoped that the mileages tabulated above facilitate flight planning because the addition of small sector mileages is no longer necessary.

NOTICES TO AIRMEN

SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air /gnd communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25,D.C. for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent In other words, a temporarily closed airport is ordinarily of much more importance from a safety angle than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

USE OF AIRPORTS BY MILITARY AIRCRAFT: (1) AAF REGULATION 85-2: The attention of Army clearance personnel and of Army pilots is invited to the provisions of Section III, AAF Regulation 85-2 and AAF Regulation 85-2A, which state in part: "Except for those Army aircraft assigned to civil contractors or agencies under bailment contract, no Army aircraft will utilize civil airports which have not been leased, purchased, or where AP-4 or similar landing rights agreements have not been negotiated by the Government, except in case of emergency or in case of official business. Each instance of flights in AAF aircraft for official business will be covered by competent air force, major air command, or higher authority orders. Each instance of flights for official business in organic aircraft of the Army Ground Forces will be covered by written orders of the commander of the unit to which the aircraft is assigned. These written orders must designate the field of intended landing. Unauthorized use of such airports is a substantiating factor in claims for damage with accompanying requests to the Government to bear maintenance and repair costs or to provide Government equipment at such civil airports. Notation will be made by clearing authorities in Remarks section of AAF Form 23 that competent authority authorizes use of such fields and will be transmitted in Remarks Section of the flight plan as 'authorized flight'. All landings by military aircraft without competent written orders on inactive, temporarily inactive Army airfields and civilian airports, except in case of emergency, will be limited to the ones identified by letters "A, N, NG, or P" in the Airman's Guide. It is the responsibility of the various air forces, major air commands and certain field activities under the direct control of the Commanding General, AAF, to prevent unauthorized use of airfields and airports as outlined in this Regulation".

2. "OFFICIAL BUSINESS" within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the puspose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

3. POLICY OF ARMY USE OF TEMPORARILY INACTIVE AIRFIELDS: (a) Municipal airfields which have been used jointly by the Army Air Forces and civil interests and at which Army facilities are temporarily inactive but the civil facilities are still active, may continue to be used by military aircraft. No servicing other than that provided by commercial concerns will be available. Such airfields will be identified herein (directory section only) by the following notice: "ARMY TEMP INACTIVE - CIVIL FACS"
(b) Temporarily inactive Army airfields used exclusively by the Army Air Forces (either owned or leased) or municipal airfields used jointly by the Army Air Forces with civil interests at which both Army and civil facilities are inactive will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned. Such airfields will be identified herein (directory section only) by the following notice: "TEMP INACTIVE. NO FACS.". Above policy statement is not to be construed as countermanding any AAF Regulations or letters governing command use of municipal airports or Army airfields.

4. "CLOSED" ARMY AIRFIELDS: Under the provisions of AAF Regulation 60-23 or under specific direction of the CG, AAF, from time to time certain airfields under the jurisdiction in whole or in part of the Army Air Forces will be listed as "CLOSED": Such as, (a) Fields closed to all transient traffic except on official business or in emergency; (b) Fields that have been declared surplus to the AAF and on which permits have not been issued for civil use or which have not been otherwise disposed of by WAA. The listing "CLOSED" will appear in the directory section only. Airfields so designated will be used on official business only under written orders in each case.

CLEARANCE OF AAF AIRCRAFT: National Guard Units are not authorized to clear AAF aircraft. At bases occupied solely by National Guard, clearance for AAF aircraft will be obtained from Flight Service in accordance with provisions of paragraph 2, AAF Regulation 60-22.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Fld, Ala., MacDill Field, Fla., Washington National Arpt, D.C., or Westover Field, Mass. ALASKA - McChord Fld, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field.

PILOT PROCEDURES WITH FLIGHT SERVICE, USING AAF MILITARY FLIGHT SERVICE COMMUNICATIONS SYSTEM (PLAN 62): (1) Departure from AAF Bases: No change. References: AAF Regulations 15-23 and 60-22 (2) Departure from non-AAF Bases: All pilots of AAF aircraft departing from a non-AAF base will file a complete flight plan, with, and when necessary secure approval from, the nearest Flight Service Center prior to take-off, or as outlined in AAF Regulation 60-22. Communication with a Flight Service Center may be established by a collect telephone call. When a telephone is not available the nearest AAF base or AACS station may be contacted by radio After obtaining the Flight Service approval, pilots contemplating flight under Instrument Flight Rule conditions will secure a CAA Airway Traffic Control clearance The CAA clearance normally can be obtained more rapidly by contacting CAA direct through CAA communications facilities. However, if CAA commun. facs. are not available, the CAA clearance may be obtained through Flight Service. (3) Change of Contact Flight Rule (CFR) Flight Plan Enroute: AAF aircraft requiring a change of route or point of first intended landing of a CFR flight plan enroute will contact Flight Service through an AACA airway radio station or control tower, submit the information required by AAF Regulation 60-22 and, when necessary, secure Flight Service approval. (4) Change of IFR Flight Plan, or CFR to IFR, or IFR to CFR Enroute: Any AAF aircraft requiring a change or route, altitude, point of first intended landing, cruising speed, or alternate airport, or change from CFR to IFR, or IFR to CFR, enroute will contact a CAA communications station for CAA Airway Traffic Control clearance and Flight Service approval if necessary. Pilots possessing clearance authority must furnish Flight Service their new flight plan. If communication with a CAA communications station cannot be established, an AACS airways radio station will be contacted for coordination between CAA and Flight Service and to obtain CAA Airway Traffic Control clearance and Flight Service approval when necessary. (5) CFR Position Reports: When flying under CFR conditions, pilots will make position reports, wherever practicable, to AACS airway radio stations enroute and receive any necessary advisories from Flight Service. One position report each 30 minutes is considered adequate. (6) IFR Position Reports: When flying under IFR conditions, pilots will first make position reports to CAA communications stations as heretofore required by Civil Air Regulations, and then to AACS airways radio stations en route, and receive any pertinent Flight Service advisories (7) Voice Calls: AACS airways radio stations will be called by the location name followed by the word "airways", such as "Bolling Airways". This is distinct from the CAA radio call system which uses the location name followed by the word "radio", such as "Washington Radio". (8) Arrival Reports at non-AAF Bases: Arrival reports from fields where there is no established AAF Base Operations will immediately be sent by the most expeditious means available or by a collect telephone call to the nearest Flight Service Center. (9) RON Messages: At bases not connected with Flight Service Centers by military interphone, pilots may file RON messages via long distance telephone to the Flight Service Center at the time the arrival report is filed (10) All VHF equipped aircraft will be provided with a card to be prominently mounted near the VHF control box which will specify button, frequency, and service obtainable. An Index of AACS airways stations within the U.S., together with a listing of the assigned frequencies, may be found on pages 100 and 101 of T.O. 08-15-1. The following table displays the channels and frequencies normally used to contact the various communication installations:

Button	Frequency	Service	
A	116.1 mcs.	CAA AIRWAYS (RANGE STATIONS)	** AACS Airways
B	126.18 mcs.	CONTROL TOWERS	(Plan 62)
C	137.88 mcs.	AACS AIRWAYS (PLAN 62)	** Control Towers
D	140.58 mcs.	MILITARY EMERGENCY & GCA FINAL APPROACH	

** Available for service indicated on a secondary basis. CONTROL

(11) It will be some time before all AAF aircraft are equipped for operation on AACS airways frequencies. It is not the intent that pilots flying aircraft not so equipped attempt to make position reports to Flight Service as described above. Emergency Flight Service advisories, however, may be transmitted to such aircraft on the AAF control tower frequency Aircraft which are equipped for operation on AACS airways frequencies will contact airways station whenever possible rather than AAF control towers. (12) The following list of telephone numbers will be used for contacting military Flight Service Centers:

CAA AREA	FLIGHT SERVICE AREA	PHONE NO.
Washington; Pittsburgh; New York; Boston	Olmsted Flight Service Center Middletown, Penna.	Steelton 93387 Steelton 93470
Jacksonville; Miami	MacDill Flight Service Center Tampa, Fla.	Tampa H-4871
Memphis; New Orleans; Atlanta	Maxwell Flight Service Center Montgomery, Ala.	Montgomery LD 89
Cleveland; Cincinnati; Detroit;Chicago;St. Louis	Wright Flight Service Center Dayton, Ohio	Osborn 88691 Osborn 88692
Ft. Worth; San Antonio; part of El Paso	Ft. Worth Flight Service Center** Fort Worth, Tex.	Fort Worth 77251
Denver; Minneapolis; Kansas City	Lowry Flight Service Center Denver, Colo.	Denver LD 116 LD 117
Los Angeles;Albuquerque; part of El Paso	March Flight Service Center** Riverside, Calif.	Riverside 7107 Riverside 7108
Oakland; Salt Lake	Hamilton Flight Service Center Hamilton Field, Calif.	San Rafael 770 San Rafael LD-20
Great Falls;Seattle	McChord Flight Service Center Tacoma, Washington	Tacoma LD-20 Tacoma LD-21

**REVISION OF ARMY FLIGHT SERVICE CENTER AREAS: The boundary between the March and Fort Worth Flight Service Areas has been moved. That part of the El Paso CAA area lying E of the following points now falls within the Fort Worth Flight Service Area; that part lying W within the March Flight Service Area: From 25 miles SE of the Clarendon Range, thence SSW to lat. 33°, long. 101°35', thence W to 33°-104°, thence S to 31°-104°, thence W to the U.S.-Mexican Border at 31°-105°34'.

IFR CLEARANCE OF ARMY AIRCRAFT: Except as outlined below, no Army aircraft will be cleared for instrument flight unless such aircraft is equipped with a low frequency radio receiver capable of reception in the 200 to 400 kc. band. The BC-1206 (Detrola) receiver is not considered adequate as regards compliance with this directive. Aircraft not so equipped may be permitted to clear under IFR when the instrument type clearance is necessitated by reduced local visibility caused by fog, smoke, or haze, or when the flight will not be conducted under conditions which will require navigation by radio.

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan) CFR is defined as ceiling at least 2000' and visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into

the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the five stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempt from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A, N, NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS:

Following are Army assignments:

Channel	Frequencies
A	116.1
B	126.18
C	137.88
D	140.58
G	137.70
H	134.10
U	108.3
V	108.7
W	109.1

Following are Navy assignments:

Channel	Frequencies
1	116.1
2	142.56
3	126.18
4	128.70
5	143.28
6	134.64
7	143.64
8	142.02
9	142.74
GUARD	140.58

ARMY DISTRESS, AND SEARCH AND RESCUE PROCEDURE: 1. When an aircraft is in distress and the pilot is unable to establish two-way communication on any frequency, he will transmit as follows: "Mayday. Mayday. Mayday. This is Army 1 2 3 4, this is Army 1 2 3 4, this is Army 1 2 3 4, my approximate position is --, Over." Pilot may follow this emergency transmission with any other information he deems necessary. Although Channel "D" (140.58 mcs) has been designated as the Joint Army-Navy emergency frequency, the pilot in distress will use any or all frequencies at his disposal. Communication coverage on various frequencies will vary depending upon the location of control tower, airways, VHF/DF, and other radio stations. 2. To request escort by Air Rescue Service rescue plane when two-way communication can be established, aircraft in distress will: (a) Contact Flight Service through nearest AACS airways station. (b) Give position report; if position is not known, request QTF (Fix). (c) Give nature of trouble, also estimated time plane can remain aloft. (d) Follow instructions transmitted by Flight Service. (e) Follow instructions of Air Rescue Service aircraft after contact is accomplished. 3. To report sighting of crashed aircraft: (Note: Previously reported and identified crashes are marked with yellow paint). (a) Contact Flight Service through nearest AACS airways station. (b) Give position of crash. (c) Evidence of survivors, type and number of aircraft (if possible). (d) Follow instructions transmitted by Flight Service. (e) Immediately after landing make a complete report for transmission to the nearest Air Rescue Unit; also notify nearest Army Air Forces installation.

SERVICING FOR ARMY AIRCRAFT: Transient Army servicing is usually available at active Army airfields and, when available, is indicated in the remarks column, data section by an "S" designation (as defined under data legend) and octane ratings of gas are shown. At airport designated by a single (A) in the "Airman's Guide" (joint use with civil interests), Army servicing is available unless remarks column carried "ARMY TEMP INACT-CIVIL FACS." Notation is given in remarks column to servicing available for military aircraft: for example, "91,100 oct. Army" This may be contract service. As a matter of policy, limited servicing and maintenance will be available to transient military aircraft at Air National Guard Fields (on Form 15) Notation with regard to available facilities will be shown in the remarks column; for example, "91,100 oct. NG". At (P) or civil fields, military servicing or Army contract fuel will not be available; servicing may be secured in emergency only on a Form 15. Army servicing may be procured at Navy fields on a Form 15.

✓ REVISION TO ARMY FLIGHT CLEARANCE PROCEDURE: Effective August 15, 1947, within the continental limits of the U.S., flight clearance procedure is revised as follows: (Conflicting portions of AAF Regulation 15-23 and 60-16 are being rescinded): All written weather data will be eliminated from Form 23. Forecaster will indicate on Form 23 whether the flight should be conducted under IFR or CFR conditions. A verbal briefing consisting of at least the following factors will be given: (1) Existing synoptic situation and terminal forecast for destination, and if required, for alternate. (2) Existing route weather. (3) Location of pertinent hazardous weather areas and recommended procedures for avoiding them. The pilot will certify on Form 23 as follows: "I have been adequately briefed on the current and forecast weather affecting my flight and I understand the weather situation". A written or cross section forecast will be furnished only upn request submitted two hours in advance. At non-AAF bases and AAF bases where no forecaster is on duty, the appropriate Flight Service Center forecaster will brief the pilot verbally over the interphone system or telephone: The Flight Service dispatches will monitor receipt of pilots acknowledgment of adequate weather briefing.

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof

---

✓ REISSUANCE OF EXPIRED PILOTS CERTIFICATES: 20.550 Reissuance: Any person who on June 30, 1947, held a valid private or commercial certificate and who failed to exchange such certificate in accordance with Section 20.55 of the Civil Air Regulations, may, notwithstanding such failure and without other showing, obtain a pilot certificate with appropriate ratings upon application to the Administrator.

✓ PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

✓ ISSUANCE OF STUDENT PILOT CERTIFICATES AND TEMPORARY STUDENT PILOT CERTIFICATES. DURATION OF PILOT CERTIFICATES WITH PRIVATE OR COMMERCIAL RATING: The purpose of this regulation is to provide that (1) an authorized representative of the Administrator, as well as the Administrator, may issue student pilot certificates, (2) temporary student pilot certificates as well as pilot certificates with private or commercial rating may be issued by the Administrator or his authorized representative, and (3) pilot certificates with a private or commercial rating shall not have a prescribed expiration date. Effective July 22, 1947, Part 20, of the C.A.R. was amended to read in part as follows: "20.00 Issuance. A student pilot certificate will be issued by the Administrator or his authorized representative to an applicant who meets the applicable requirements." "20.51 Duration. (A) A student pilot certificate shall expire 24 calendar months after the month of issuance. (b) a pilot cer-

tificate with a private or commercial rating shall remain in effect unless it is suspended, or revoked, or a general termination date for such certificate is fixed by the Board." "20.52 Temporary certificates. The Administrator or his authorized representative may issue a temporary student pilot certificate or a temporary pilot certificate with a private or commercial rating for a period of not to exceed 90 days, subject to the terms and conditions specified therein by the Administrator. 20.53, Reinstatement, repealed.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers: (1) Discontinue all unnecessary low flying. (2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas. (3) Re-route channels of approach and departure to avoid residential and business districts whenever possible. (4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum (5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

✓ SEAPLANE BASE DIRECTORY: A new Seaplane Base Directory, dated June 15, 1947, has been mailed to all seaplane base operators and seaplane owners on record It is obvious from correspondence received that not all operatbrs and owners received their copies. This is notice, therefore, that any qualified non-recipient may have a copy upon request to: Office of Aviation Information, Attention: A-258, C.A.A., Department of Commerce, Washington 25, D.C.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a United States citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flight should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize. (See pages 144, 145, 146 for VHF range coverage).

NEW PRIVATE FLIER VHF FREQUENCIES: All CAA Communications Stations and Towers are discontinuing receiving watches on 131.7 mcs. and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs. for transmission to CAA Communications Stations and 122.5 mcs. for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs. but the communications station program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs: in addition to towers' low frequencies. See individual data pages in the Airman's Guide for inclusion of these frequencies as commissioned.

U. S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

INSTRUMENT FLIGHT, NEW YORK METROPOLITAN AREA: Revised arrival, departure, holding instrument approach and control procedures utilizing new radio aids were placed in effect in New York Metropolitan Area. Non air carrier pilots proposing instrument flight through this area or to or from Newark, Mitchel, or La Guardia Fields should write the Chief Controller, New York Air Traffic Control Center, Box 575, La Guardia Field, New York, for copies of applicable Operations Letters describing these procedures

---

CFR FLIGHT PLANS, AND ARRIVAL REPORTS: CFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communications systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight. To reduce radio congestion, pilots should file CFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting CFR flight plans for transmission and will not normally file arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

TETRAHEDRONS: The tetrahedrons at the following airports were discontinued July 1, 1947: Atlanta Arpt, Ga., Orlando Arpt, Fla., Birmingham Arpt, Ala. Those at the following airports were leased to municipalities for maintenance and operation: Miami Arpt, Fla., West Palm Beach Arpt, Fla., Jacksonville Arpt, Fla., Tallahassee Arpt, Fla., Savannah Arpt, Ga., Charleston Arpt, S.C., Raleigh Arpt, N.C., Spartanburg Arpt, S.C., Charlotte Arpt, N.C., Winston-Salem, Arpt, N.C., Greensboro, Arpt, N.C., Nashville Arpt, Tenn., Knoxville Arpt, Tenn., Memphis Arpt., Tenn., Jackson Arpt, Miss. (7-3)

✓ REVISION OF A.T.C. AREA BOUNDARIES: Effective August 11, 1947, the boundaries between the Cleveland and Cincinnati ATC Areas were relocated as follows: On Red 27 - to 25 miles S of Findlay Radio Beacon Station; on Amber 6 - to 25 miles S of the intersection of Red 17 and Amber 6; on Blue 15 - to 25 miles SW of the intersection of Red 17 and Blue 15. Concurrent with the above the affected portion of the Cleveland-Cincinnati Flight Service Area boundaries will be relocated to connect with the above locations.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct "TO-08-15-2", (a) page 45, AAF Air Rescue Svc, by showing 5th Rescue Sqd at MacDill Fld, rather than at Morrison Field. Telephone No. will be furnished at a later date. (b) page 24, by showing Flgt."D", 5th Rescue Sqd at Westover Fld. instead of Air Rescue Detachment #2.

Correct "TO-08-15-3", page 73, by deleting reference to Channel A at Marshall Field, Kans. radio range, as radio range cannot be contacted on this frequency.

Correct "TO-08-15-1", by showing N signal in NW quadrant at Eglin Field, Fla. Weather is broadcast at 29 minutes past the hour.

Correct Alaskan Airman's Guide, by changing the call letters of Kodiak GCA from "CORKY" to "KODIAK GCA".

Correct Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947, (a) Chapter II, page 11, by changing the identification for Kirksville, Mo. to KKV instead of KKU. (b) Chapter III, page 17, by inserting Ontario, Ore. under 382 kcs. instead of 305 kcs. (c) Chapter XIII, page 168, by changing San Diego, Calif., Lindbergh Field remarks column to read "Climb to 3000' on SE leg. . ." (d) Chapter I, page 8, by showing Ponca City, Okla. as an MH fac. instead of a Range. (e) Chapter III, page 18, by adding Helena, Mont. to transmitting frequency index 111.1 mcs. (f) Chapter I, page 7, by listing New Florence, Mo. as an H fac. (g) Chapter IV, page 24, by showing the call letter for Lucin, Utah as KTWU instead of KYWU.

(h) Chapter IX, page 114, under heading of "Handling of CFR Flight Plans and Arrival Reports", erroneously states that CFR flight plans are forwarded in the same manner that IFR flight plans are. CFR flight plans are not transmitted. Upon termination of a CFR flight, the pilot should close out his flight plan. Notice of arrival is then sent over the C.A.A. communication system to the station holding the original flight plan. See page 153 of this issue for details.

(i) Chapter V (OFACS), page 27, by deleting the following data: Balboa - 3104,6210,transmitting; Canton - 11369, transmitting and receiving; Guantanamo - call sign "WFT"; Honolulu - 11369, transmitting and receiving on Honolulu - Canton - Palmyra Route; Palmyra - 11369, transmitting and receiving; San Francisco - "Seaplanes Only"; San Juan - 3182.5, 4917.5,2870, transmitting and receiving, 3117.5, 4495, receiving.

By adding the following data: Balboa - 3400, 6515 transmitting and receiving on Voice Balboa - Mexico Route; Canton - 500, 8280 transmitting and receiving on CW International Distress, 4495, 6970, receiving on Voice Military frequencies, 11344 transmitting and receiving; Everett - Remarks: At 15: Vancouver, B C., Victoria, B. C., Princeton, B. C., Portland, Ore., Yakima, Wash., Ephrata, Wash., At 25: Annette Island, Alaska, Patricia Bay, B. C., Port Hardy, B. C., Massett, B. C., Comox, B.C. At 37: Boeing Field, Seattle-Tacoma Airport,Seattle Naval Air Station,Everett; Wash., Bellingham,Wash., Vancouver, B.C.; Guam - Radio Call: KCD, 3395,6577,8577, 11369, transmitting and receiving on CW Opers. cont. Honolulu-Midway-Wake-Guam Route, 17319 transmitting and receiving on CW on req., 8280 transmitting and receiving on CW International Distress.; Guantanamo - Radio Call: NAW-1; Honolulu - 2976, 5165 transmitting on Voice Weather broadcasts at 15 and 45 past each hour: Honolulu terminal forecast and winds aloft plus John Rodgers Field, Hickam Field, Kanoehe, Ewa, Maui,Hilo, Port Allen, Barbers Point, Molokai, Lanai, Upolu Point, Barking Sands Surface Reports. Last five reports available only 0800H to 1600H, 500-8280 receiving on CW International Distress. Type Emission CW Weather broadcast every hour on half hour on all route frequencies in use when flights inbound: Honolulu and Hilo surface reports, 11344 transmitting and receiving on CW Honolulu-Canton-Palmyra-Sydney route; Miami - 6583 transmitting and receiving on CW Miami-San Juan-Canal Zone route; Midway - 17319 transmitting and receiving on CW on request; New York - 3380, 5960,8720,12395,16250 transmitting on CW Weather broadcast hourly at 55, surface reports: N.Y., Boston,Bangor,Newark, Philadelphia,Baltimore,Washington,Norfolk, plus navigation reports; Palmyra - 11344 transmitting and receiving on CW Opers. cont. Honolulu-Canton,Palmyra,Sydney route, 500-8280 transmitting and receiving on CW International Distress, 4495 receiving on Voice Military Frequency, 364 transmitting on Beacon and Voice Weather broadcast (local) at 05 and 35 hourly from 1800 to 0300 GCT; San Francisco - 4275,5145,6675 transmitting and receiving, 2940 transmitting and receiving; Trinidad - Radio Call: NYS-1; Wake - 17319 transmitting and receiving on CW on request; Anchorage - KIS, 1674,6537,9980 transmitting and receiving on CW Medium-long range, KCDW,2946, 5872.5,118.3 transmitting and receiving on Voice Medium range, KCDW 338 transmitting, and 3105,4495,6210,5037.5 receiving on Voice and Range Voice, Short Range, KIS, 500,8280 transmitting and receiving on CW International Distress, KIS 4580,8220 transmitting on CW Weather broadcast hourly at 52: Anchorage (Merrill,Elmendorf Flds), Fairbanks (Ladd, 26 mi. and Weeks Flds), Big Delta, Tanacross, Northway, Aishihik, Whitehorse, Sheep Mtn, Gulkana, Kodiak, No. Dutch Island, Middleton Isl, Cordova, Cape St. Elias, Yakataga, Yakutat, Gustavus, Kenai, Homer, Iliamna, Port Heiden, Ft. Randall, Ft. Glenn, Adak, Massacre Bay, Shemya.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
Ottumwa, Iowa	Raobs			Discontinued
Culiacan, Sinaloa, Mexico	6-hourly	24-49,107-24	600'	Established
Guaymas Son., Mex.	6-hourly	27-55,110-54	13'	"
Bishop, Calif.	Pibals	37-22,118-25	4145'	Begun
North Bend, Ore.	Supple.wea.	43-24,124-14	4'	Established
Corvallis, Ore.	Supple.wea.	44-30, 12-17	235'	"
McMinnville, Ore.	Supple.wea.	45-11,123-08	156'	"
Minross, Mich.	Hourly	46-15, 84-28	780'	"
Montrose, Colo.	Supple.wea.			"

NOTE: Hourly in lieu of supplementary weather reports now available from Roswell, New Mexico.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off. (b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and C.A.R. Digest or Manual 60). (c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

FOREIGN DATA

SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Vol. 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

FREQUENCIES GUARDED BY U.S. OPERATED OCEAN STATION VESSELS: Effective Aug. 5, 1947, all U.S. operated ocean station vessels in the North Atlantic will guard 118.1 mcs for routing VHF communications with aircraft in lieu of 116.1 mcs. Continuous guard of 140.58 mcs. distress frequency remains unchanged.

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom Military Air Bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the U.S. or the United Kingdom and are in ferry status. (a) for regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana. (b) for alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad. Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

TRANSMISSION OF INTERNATIONAL NOTAMS: Effective May 10, 1947, the transmission of international notams to Service A circuits by WSY N.Y. was discontinued. Offices desiring receipt of this material should obtain receiving drops on the Service O system.

INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, WFM Lagnes, Azores permanently decommissioned. The following radioteletype circuits are established and in operation at CSY Santa Maria; WSY New York; DIP Shannon; FXO Paris; NHY Port Lyautey. Inter-island radioteletype link CSY Santa Maria to WYQY Lagens will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures

---

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, San Juan NAS, Trinidad NAS, Guantanamo NAS, guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

LORAN RATE RELOCATED: "Frederick Dahl Loran Rate 1L4" shifted to new operations bldg. June 23, 1947. This change involved new antennas, transmitter, timers, and transmission lines. A Loran System error may develop.

AFRICA-Casablanca, Africa: The following established circuits are now in operation at CNO Casablanca Aeronautical communication station: CSZ Lisbon, FXW Bordeau, FOO Paris, CNC Tangier, CNS Gaercife, CNA Fez, CNV Oujda, CNU Meknes, FOR Oran, FNA Algiers, CNN Taza, CNZ Fort Trinquet, CNY Tindouf, CND Agadir, CNX Marrekech FOK Dakar. Landline teletype to FFAG Algiers and CNPL Port Lyautey. Guards Route C radiotelegraph frequencies 3248, 6563, 8538, and 12776 kcs. Additional air ground guards 333, 336, 6510, 4195 kcs. Radio range and beacon identification "KR", 222 and 403 kcs. respectively. Tower voice VHF 116.1 mcs. and 6440 kcs.

Dakar, Africa: Effective May 15, 1947, Overseas Foreign Aeronautical Communications Station WFG, YOFF Airport, Dakar FWA, will be combined with FOK under call sign FOK. Following CAA circuits will be operated and supervised by French Nationals: A/G 3285, 6563 kcs. cont., 11319 kcs. daylight hours, point-to-point circuits, FOK/WFH Port Lyautey, FOK/ELPA Roberts Field, FOK/ZVJ Recife, FOK/ZNT Accra. Following principal circuits operation and supervision French Nationals: Point-to-point, FOK with following stations, CNB Casablanca, X 08 Natal, FOO Paris, FGS Abidjan, FNA Algiers, FSP Port Etienne, FMW Port Au France, FHK Amsterdam. Yoff Tower, range and beacon operation and supervision French Nationals, frequencies unchanged.

Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

Port Lyautey Communications: Effective June 11, 1947, circuit operations NHY Port Lyautey to FOK Dakar and CSZ Lisbon were transferred to station CNO Casablanca. Following civil circuit functions remain in operation NHY Port Lyautey: Circuit 207T Port Lyautey-Santa Maria. Circuit 224 Port Lyautey-Roberts Field, Liberia. 24 hour landline teletype operations connecting NHY Port Lyautey and CNO Casablanca facilitates E and W traffic movements via 207T. Port Lyautey maintains continuous civil air ground guards 3285, 6563 kcs, 11319 kcs. from 0700 until 2200 GCT. Additional civil air ground guards 8554, 8543, 8523 kcs. upon request.

AZORES-Fayal-Radio: Radio beacon call sign CTN. Operates on 333 kcs. days and on req. Air to ground call sign CTN for emergency use only on 6563 and 6577 kcs.

Flores-Radio: Radio Beacon call sign CF operates from 00 to 05, from 20 to 25 and from 40 to 45. Reliable for Homing.

Lagens-Radio: Tower operating on 116.1, 126.18 mcs. and 2834, 2993 kcs. for continuous transmitting and receiving. Tower on 4220 kcs. for emerg. and on 5000 kcs on req. OP range on 341 kcs in cont. operation with legs of 343° and 163° mag. reliable for instrument letdowns if caution is used. DK radio range on 288 kcs on cont. operation with legs of 343° and 163° mag., reliable for instrument letdowns if caution is used. Z markers are operating on both ranges. Racon beacon inoperative until further notice. SCS-51 operates cont. between 1730 and 0900Z and on 30 min. req. thereafter on channel Y for runway 16 and channel X for rnwy 34 if no glide path operating on channel Y. Localizers not modified in accordance with Technical Order 16-1-62. Long range DF on 6563 kcs days and night transmitting and receiving and receives fixing signal on 6210 kcs call sign is CSE9. Short range DF call sign CSE7 on 4575 kcs operating on req. from Lagens tower or CSY at Santa Maria. GCA operates on one hour request on all voice frequencies. Field: Crews inbound to Lagens will be cautioned of high terrain on E and W sides of rnwy 34. Due to repairs being made on 2700' on the N end of rnwys 16/34, no GCA landing will be made on rnwy 16 until further notice.

Santa Ana-Radio: Radio Beacon call sign BB7 operates cont. on 308 kcs.

Santa Maria-Radio: Tower transmits and receives on 116.8 and 126.18 mcs and 2834 kcs. Tower transmits on 278 kcs and guards 6440 kcs. Radio range operates cont. on 249 kcs. Call sign WY. Radio Beacon operates on 329 kcs., call sign WY. No Z marker on WY range. SCS-51 localizer on channel X on rnwy 19 operates cont. Glide path has resumed operation. Localizer not modified in accordance with T.O. on 6-1-62. Santa Airways operates on 3093 kcs cont. and 4220 kcs in emerg. Air to ground call sign CSY operates cont. on 6563, 12776, 3248, and 8538 kcs on CW. CSY is ICAO control center for the Azores. All letdowns are to be made on the N and S legs of the WY range.

BELGIUM-Brussels: ONBU reports as from July 1, 1947, the Queen Code ICAO document 2560 will be used by all the Belgian Stations.

BRITISH HONDURAS-Belize, Landing or Private Aircraft: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, British Honduras, at least 4 hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z through MIAMI CAA-operated overseas foreign aeronautical communication stn.

BRITISH WEST INDIES-Kingston, Jamaica-Montego Bay Airport: Montego Bay Arpt, is a British Controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communications Stn-call letters MRX. Flight plans also must be filed for all flights departing from U.S for Montego Bay They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communication Station at Miami - call letters WBR, or New Orleans - call letters WEK.

Kingston, Jamaica-Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs only, and guards 2870, 3105, 6210 kcs. It is necessary for all itinerant flights coming to Palisadoes to file a Flight Plan from point of departure to the Communications Station at Kingston - call letters MRX. This Flight Plan should be marked for Information: Palisadoes Airway Traffic Control The route frequency of

6515 kcs. A3 emission is guarded at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA-operated Overseas Foreign Aeronautical Communications Station, WBR, Miami.

Trinidad NAS: Effective June 16, 1947, Navy Squadron commenced conducting aerial gunnery from 1300Z to 2000Z daily except Sat. and Sun. until further notice. Surface craft and aircraft remain clear of area 10° N, 60°45' W, 10°30', 60°45', 10° N, 60° W, 10°30', 60°. The marine radiobeacon at Trinidad was discontinued 7-10-47

CANADA-Barrington-Radio: Name of this FM will hereafter be Hemmingford FM. (7-1)

Megantic, P.Q.-Radio: Correct var. 18° W. Courses 105°,176°,285°, 359°.

Moncton, N.B.: Effective July 15, 1947, the following changes apply to air ground services offered by stations CYA Moncton: Moncton CYA will maintain standby watch only on frequencies 6563, 6577, 8538, 11319 kcs. from 1300 to 2000Z daily and on 3248, 3285, 6563, 6577 kcs. from 2000Z to 1300Z daily and will transmit on above frequencies only: (a) when called by aircraft; (b) on request OATC CFMO; (c) on request VOAC Voga.

Montreal, P.Q.-Dorval: Effective July 15, 1947, the following changes apply to air ground services offered by station CYB Dorval: Dorval CYB will maintain continuous watch and transmit on frequencies 3248, 6563, 8538, 12776 kcs only.

Quebec, P.Q.-Radio: Correct var. 19° W. Courses: 61°,171°,248°,356°.

Vancouver Arpt., B.C.-Radio: Tower discont transmitting on 116.1 mcs. This corrects "AIRGI", Vol. 2, No. 9. (7-23)

Yarmouth, N.S.-Radio: Correct var. 21° W. Courses: 16°,89°,180°,267°

CUBA-Rancho Boyeros Airport, Havana: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file a flight plan prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type; route of flight; time of flight departure; time of minutes; altitude, CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge.

ENGLAND-London Airport: SCS51 and SBA facilities to be considered out of service as navigational or landing aids. They can be used for holding and letdown procedures only until further notice. Owing to the possible presence of vehicles within the restricted area of the SCS51 and SBA sites the accuracy of these installations is questionable

GREECE-Hassani Airport, Athens, Radio Call: Effective April 30, 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this station.

LABRADOR-Goose Bay: Effective July 15, 1947, the following changes apply to air ground services offered by station VOAV Goose Bay: Goose Bay VOAV will maintain continuous watch and transmit on frequencies 3248, 6563, 8538, 12776 kcs., but with frequencies 3285, 6577, 8554 (receive and transmit) available on request.

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft.

Gander: Gander Metar weather broadcast now in operation on 363 and 5410 kcs. simultaneously at hour plus 20 min. and hour plus 50 min. Reception reports on 5410 kcs requested. Effective immediately the dewpoint will be added as a remark at the end of the Metar for Gander, Stephenville, Sydney, and Moncton broadcast by VOAC on 5410 and 363 kcs at hour plus 20 and hour plus 50. Example: D.P. 47. Tele VOGA

Torbay Airport: Torbay Airport open to traffic between hours of 1030Z and 0230Z. No aircraft will be dispatched to arrive at Torbay between hours of 0230Z and 1030Z. No traffic will be available between landing and takeoff minimums of 1930Z and 1030Z. Landings and takeoff minimums as published in ATLD Amendment #16 "Mile visibility, takeoff night 500' 1 mi. visibility, landing day 800' 1 mi. visibility, landing night 800' 3 mi. visibility".

PACIFIC OCEAN-Weather Station Communications: Effective July 1, 1947, Pacific Ocean Weather Station FOX discontinued use of 4220 kcs for voice communications with trans-Pacific aircraft and substituted 5165 kcs for this purpose. The following paragraphs of SOP-1-A should be changed in accordance with the above: Section IV. 4 (a); 4 (b); 5 (a) (5); 5 (b); 5 (c) (1); 7 (a).

Pacific ICAO Procedures: International Civil Aviation Organization Airway Traffic Control and Communication Procedures were placed into effect in the Eastern Pacific effective Aug. 1, 1947

PUERTO RICO-Caguas: Radio antenna tower under construction unlgtd until further notice. Height 150' located one and one quarter miles N of Caguas, lat. 18-15-20 N, long. 66-1-53 W

Isla Grande Airport (San Juan): Designated an Airport of Entry. (7-2)

Mayguez Airport: Caution - do not use taxi strip W of Terminal Bldg. until further notice. Men and equip. on fld. (7-17)

San Juan Seadrome Landing Lights: Effective June 9, 1947, the seadrome landing lights were discontinued and the landing light buoys were removed from the bay of San Juan at the NAS, San Juan.

San Juan Pre-Flight Clearances: San Juan Civil Air Terminal (U.S. NAS), Isla Grande Airport, San Juan, P.R. - All civil operations at San Juan Air Terminal were assumed by the Puerto Rico Transportation Authority effective March 4, 1947 Authority must be obtained for landings at this airport prior to the commencement of any flight. Address requests to Airports Division, Box 3508, San Juan, P.R. Cable address is "Autoritan".

URUGUAY-National Airport, Carrasco: Effective June 15, 1947, Air Traffic Control Tower at National Airport, Carrasco discontinued its frequency of 2870 kcs., and new frequency of 278 kcs. was commissioned. (6-3)

DOMESTIC DATA

ALABAMA- ALA-TENN-GA ARPT (BRIDGEPORT)-Ctn in wet weather (5-22)
ALBERTVILLE ARPT-SW side of strip soft, rough and washing. Soft in spots in wet weather. (4-29)
ALLENPORT ARPT (MONTGOMERY)-Muddy after rains-ctn. (5-22)
ANDALUSIA ARPT-Bare in spots. Ctn in wet weather. (5-22)
ANNISTON ARPT-Ends of strips soft in wet weather. (4-29)
ATHENS ARPT-Ctn in wet weather (5-22)
ATMORE FLYING SERVICE-1800' strip muddy when wet. (7-18)
BARIN NAAS EAST & WEST FLDS (FOLEY)-Closed to trans acft. (5-6)
BATES FLD (MOBILE)-RADIO: Twr equipped to transmit on and guard 121.9 mcs for mobile gnd traffic. (5-18)
BEAVER DAM FLD (DECATUR)-Soft after rainy weather. (5-22)
BIRMINGHAM ARPT-Closed to civil acft not equipped with operating rcvr Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. Tetrahedron wind indicator lctd E end E/W rnwy to be discont. Aug. 5. (8-1)
BOYKIN FLD (DEMOPOLIS)-Cattle on fld. (5-22)
BREWTON ARPT, new-Cattle on fld. (5-22)
BROOKLEY FLD (MOBILE)-RADIO: AACS oper HF/DF stn temp suspended. (4-24)
FLD: Soft-use rnwys, taxi strips only. (4-23)
CENTRAL PARK ARPT (BIRMINGHAM)-Avail. lgt acft in all weather (5-22)
CENTRE ARPT-NNW/SSE strip closed. N side E/W strip rough in wet weather. Avail. lgt acft only. (4-29)
CHASTAIN'S ARPT (PRICHARD)-Soft after rains. Shallow dip near center of E/W strip. (5-22)
CRAIG FLD (SELMA)-RADIO: Army DF stn inop. (12-20) FLD: Bndry lgts inop. (5-29)
CULLMAN ARPT-Soft in wet weather. (5-22)
DAVENPORT ARPT (FT. PAYNE)-Muddy in wet weather. S end rough. (5-22)
★DOTHAN-RADIO: NW and SE courses realigned to 143° and 323° July 25th. Figt-checked, courses correctly aligned.
EUTAW ARPT-Use only NW/SE strip. (4-17)
FAYETTE ARPT-Avail. only lgt acft during wet weather. Trees and fone line at W end (5-22)

[redacted]:FLINT CREEK ARPT (DECATUR)-Soft after rainy weather. (5-22)
GAINESVILLE INT, SITE 55, FV-AG-Emerg use only. (5-22)
GOODYEAR FLD (GADSDEN)-Soft in wet weather. Lgt acft land with ctn. (5-22)
GRAGG FLD, SITE 27, PS-TM (CLANTON)-Ctn in wet weather. (5-22)
GREENVILLE ARPT, SITE 24, NO-AG-Soft after rains around arpt circle on N/S strip. (5-22)
GUNTER FLD (MONTGOMERY)-Closed to all trans acft. Use Maxwell Fld. (6-24)
GUNTERSVILLE DAM ARPT-Soft spots at ends. (5-22)
HARTSELLE ARPT-Use W side fld. Avoid E side. E half of strip has small depressions extending from S end for approx 600' toward the N. Small area at SW portion fld soft after rains. (5-22)
HUNTSVILLE ARPT-Sod strip rough at runwy crossings. Ngt approaches use ctn-hills NE, S, E. (4-29)
JACKSON FLD (LIVINGSTON)-Rolling and slightly rough. Soft spots along N side at SW end. (5-22)
LEGION FLD (MONROEVILLE)-Do not confuse golf course fairways with landing strips. (5-22)
LUVERNE ARPT-Ctn in wet weather. (5-22)
